Convert the following diagram to Relations using SQL

```
create table Team (
    tname char(20),
    nickname varchar(100),
    color varchar(30),
    primary key (tname)
);
```

```
create table Player (
    pname char(100),
    fav number int,
    position char(20),
    playsfor char(20) NOT NULL,
    tnumber int,
    primary key (pname),
    foreign key (playsfor)
    references Team
);
```
